

AIRLYNK

Gives the ability to control your fans through BACnet® (MS/TP or IP) and LonWorks®.

BACnet and LonWorks are both protocols used to automate or manage buildings systems (commonly called a BMS or BAS). Our fans use MODBUS to communicate, and the correct use of AirLynk, MacroAir's Interface, will allow the integration of our fans into a BMS/BAS. A BMS/BAS enables you to run the fans in conjunction with your HVAC system to help save energy costs.

Our proven solution is AirLynk, an external, high-performance building automation multi-protocol interface that is preconfigured to communicate between any MacroAir fan and various building automation protocols including: BACnet®MS/TP, BACnet/IP, Metasys® N2 by JCI, Modbus TCP/IP, and LonWorks®.

Successful integration of any MacroAir fan with a BMS/BAS is dependent upon following **these guidelines**:

- **Identify the BMS and its protocol** before the purchase order is placed. This allows the fans to be preprogrammed, dramatically reducing installation errors and integration time.
- Strictly adhere to the included installation manual to eliminate issues that will occur from wrong types of wire, improper wire terminations or wire routing.
- We highly recommend engaging our Controls Engineers to visit the site for fan start-up to insure a smooth and successful integration. Our experience has found that many installers are unfamiliar with the subtle but critical differences between BMS systems, interfaces, fan models, connection methods and best practices which result in confusion and many wasted hours due to lack of attention to detail or familiarity. For a nominal fee plus travel expenses, one of our Controls Engineers can be on site to insure a smooth and successful start-up. For more information about this service, please inquire with our Technical Services Department.

To Order BMS enabled fans and AirLynk please do the following:

- Identify the BMS network
- Discuss your network with MacroAir's Control Engineers
- Order one AirLynk to connect up to 8 fans
- Order one repeater per AirLynk if there are more than 5 fans connected to that AirLynk

Item #	Description
30-10010-00	AirLynk - BACnet, (Works on all Fan Lines), Up to 8 Fans per AirLynk
30-10011-00	AirLynk - LonWorks, (Works on all Fan Lines), Up to 8 Fans per AirLynk
10-80632-00	Repeater

*If using an AirLynk, individual control and Network Controllers are not applicable.
